

# Driven by purpose, precision and people

Mangal Industries Ltd is a design-led manufacturing company, part of USD 1.3 Bn Amara Raja Group. Mangal Industries operates through six SBUs and serves a broad spectrum of industries with deep-domain expertise in Auto Components, Metal Fabrication, Storage Solutions, Custom Fabrication, Battery Components, and Tool Works.

## Our Strategic Business Units

**AUTO  
COMPONENTS**

**BATTERY  
COMPONENTS**

**METAL  
FABRICATION**

**CUSTOM  
FABRICATION**

**STORAGE  
SOLUTIONS**

**TOOLWORKS**

Founded by visionary industrialist and philanthropist **Dr Ramachandra N Galla**, Mangal Industries was set up as a small manufacturing unit to supply components to the batteries business, over the last 25 years, it has grown into a multi-products and solutions company that lists some of the big brands as its customers.

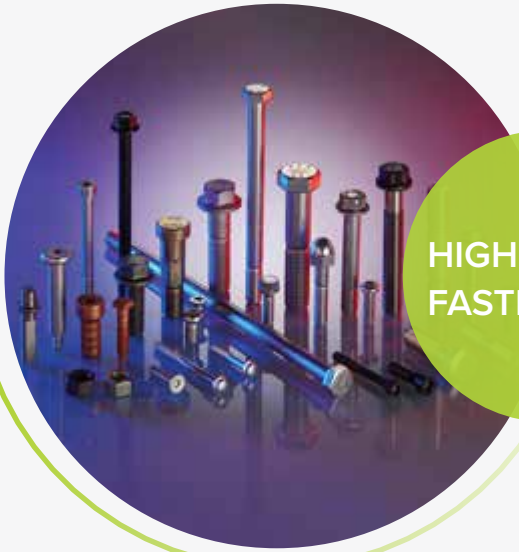

Over the years, the facilities have created thousands of non-migratory jobs, thus resulting in a strong local talent pool, and improving overall living standards in the communities it operates around. Presently, it employs over 3000 people spread across its nine manufacturing facilities and has become the second largest company within the Amara Raja group with over 1400 Cr revenues in FY22.

The state-of-art production facilities are complemented by expert teams with varied skills and experience in engineering design, manufacturing operations, supply chain management, quality assurance, HSE, supply and execution. Mangal Industries products are known for their intelligent design, precision manufacturing, timely delivery and world-class quality.

All CSR activities in Mangal Industries are executed as part of Amara Raja Group CSR activities like affordable education, skill development centre, healthcare, social forestry, and infrastructure developmental activities such as check dams, auditorium, marriage hall, RO plant, bank, telephone exchange, concrete roads, rice mill, parks and IT centre in Puthalapattu Mandal, Chittoor Dist.

# Auto Components

It has two business verticals

## HIGH TENSILE FASTENERS

Mangal Industries is a trusted component partner for both automotive and non-automotive industries. The company serves a wide range of critical applications such as Axles, Chassis, Drives, Engine, Steering, Suspension and Transmission/transaxles. With a capacity of 13000 MTPA, the Fastener manufacturing process is optimized for over a decade, to meet and exceed the quality, cost, and delivery expectations of its customers. It boasts all major Auto OEs as its customers. It supplies components to all major Auto OEMs.

Mangal is specialized in manufacturing precision Injection moulded plastic parts for diversified industries ranging from Automotive to Consumer durables, Home Appliances, Electronics, and Healthcare. It is fully equipped to handle value-added engineering plastic products with various size ranges through the latest design principles, technologies, and production practices.

## PLASTICS

## Metal Fabrication

It designs and manufactures enclosures, panels, sub-assemblies and customized parts for customers in Power Controls, Solar & Wind, Railways and Metro, Engineering and Utilities. With a capacity of 17,000 MT, the integrated manufacturing facility is equipped with the most modern machinery such as advanced laser-cutting, turret punch press, power presses, CNC bending, robotic welding, and powder coating.

# Storage Solutions

Mangal Industries offers Industrial and Warehouse Storage Solutions under the brand, **SILVER LINING Storage Solutions**. It specializes in offering high-quality, value-driven, and tailored storage solutions for various industry verticals.

Over the last decade, it has solved warehouse storage and operations management puzzles for customers in industries like Automotive, E-Com & Retail, Archival Records Management, Consumer Goods, Industrial and other sectors. It has evolved from offering static solutions to inventive automation solutions with its integration partners. It is also offering new-age solutions like a Rack-supported warehouse to save time and space, overall project cost and resources for its customers.

# Battery Components

Mangal Industries has vast experience in making various components for batteries. It has 36000 MTPA capacity with a 50T to 1400T capacity range in its three manufacturing locations in Chittoor Dist., Andhra Pradesh. It is focused on R&D for value-added engineering plastics development. The company has one of the largest plastic injection moulding facilities in the country.

## Custom Fabrication

It offers tailor-made machine building and automation solutions for various industries and applications. The product range includes Conveyors, Curing ovens, Metal doors, Industrial washing machines, mild steel and stainless steel fabrication, PVC, PP fabrication and factory automation.

## Toolworks

Mangal Industries has over a decade's experience in the moulds segment. It has modern CNC milling, grinding, Wired EDH machinery, Engineering and design expertise, and Quality Assurance processes to ensure precision products and solutions for various industries and applications. The product range includes Injection moulds, Stamping tools, Die casting dies, and Jigs & fixtures.

# Mangal's Quality Assurance

**Mangal's quality systems are robust and practiced in true spirit to ensure that the products manufactured meet your business specifications and application requirements to perfection. From raw materials to finished products, the comprehensive quality systems at Mangal ensure compliance with international standards.**

Through the **Amara Raja Way®**, our aim is to exceed customer expectations.

To accomplish this, we focus on

- Agile business strategies with risk-based thinking and anticipating future trends
- Contemporary technologies and robust design principles
- Continuous enhancement of our individual engagement, development and performance
- Operational excellence through continual improvements
- Total employee involvement
- Fulfilling compliance obligations
- Optimal utilization of energy and sustainable use of natural resources through the reduce, reuse and recycle concepts
- Zero incidents, zero defects and zero breakdowns
